Pollutec 2014 welcomes the second edition of Sustainable City Solutions on 3rd and 4th of December 2014

The first day will offer the participants executive panel discussion about the funding of sustainable cities, followed by inspiring elevator pitches highlighting “glocal” best practices where solution pioneers will present their sustainable solutions and explain how it is possible to spread it globally. On the second day, participants will have the opportunity to visit local sites that implemented innovative sustainable solutions and to join interactive workshops related to the visited sites.
